

SELECT FORMULARY PREFERRED DRUG LIST

January 2019

This formulary is a list of prescribed medications chosen by your plan for their safety, cost and effectiveness. Medications are listed by categories or classes and placed into cost levels known as tiers. An important part of the formulary is giving you choices so you and your doctor can choose the best treatment for you. This formulary shows brand-name medications are in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

Since the formulary may change, you should visit your plan's member website listed on your ID card. This website is the best source for current information about all of the medications your pharmacy benefit covers, possible lower-cost options and cost differences.
