COVID-19 MEXICO PROTOCOLS
#LIGHTITBLUE

NETWORK

Mexico has begun reopening efforts nationwide. Due to high number of COVID-19 cases in the northern region, in an effort to limit community spread, our network providers will be gradually reopening office hours this month. Clinics and hospitals in San Luis Río Colorado continue to channel patients with COVID-19 symptoms to government healthcare facilities for treatment. In the state of Baja California (Mexicali, Tijuana), private hospitals that meet requirements to treat the virus, offer treatment to COVID-19 patients - based upon bed availability.

COVID-19 TESTING

A small number of labs have been authorized by the government to test for COVID-19. Given testing is still limited, tests will be ordered by healthcare providers ONLY if considered medically necessary. Please note, patients requesting tests not medically necessary will be covered by the patient.
